PFAS information letter

Regulation (EU) 2024/2462, which came into force on October 10, 2024, provides for a gradual ban on certain PFAS substances. Starting in 2026, these substances are to be gradually removed from everyday consumer products. As feedback from our supply chain on the subject of PFAS has so far been very limited, we are currently unable to make a general statement regarding our portfolio.

This means that we cannot yet issue a general confirmation letter. Thank you for your understanding in this regard.

Kind regards,

Roland Ettinger
Managing Director
ETTINGER GmbH
